NATIONAL CANNERS ASSOCIATION

For Members  
Only

No. 1117

Washington, D. C.

December 21, 1946

## International Trade Agreements Supplementary Data Accepted

In answer to canners who have been asking whether or not supplementary data, following submission of their written briefs to the Committee for Reciprocity Information, will be accepted after the deadline date of December 21, 1946, the Department of Commerce has advised the Association that those canners who have submitted tentative briefs and wish to supplement their first presentations with additional data, written or oral, between December 21 and January 13, need not be concerned as to its official acceptance. Proper consideration will be granted those who could not get their briefs to Washington on time, the Department said.

Since N.C.A.'s distribution of data on foreign import duties of 17 different countries, the Commerce Department (Continued on page 433, look for *International Trade Agreements*)

The Association this week requested the appointment of a representative of the Fish and Wildlife Service to the Committee for Reciprocity Information. It was pointed out that manufactured products were represented by the Department of Commerce, that products from the land were represented by the Department of Agriculture but that products from the sea were not represented.

This appointment, if made, must be recommended by the present Committee and must be authorized by executive order from the President.

## B-U-L-L-E-T-I-N

There will be no issue of the INFORMATION LETTER Christmas week due to the two-day holiday observed by the printing trades and government offices in Washington. In the case of any outstanding development of importance to the canning industry, such information will be distributed by special bulletin. The next issue of the LETTER will therefore be that of January 4, unless developments in the news should warrant issuance between the Christmas and New Year holidays.

## Merry Christmas

The staff of the National Canners Association thanks the members of the Association and the many friends of the canning industry for their helpful cooperation during the past year and extends very best wishes for a Happy Holiday season and a successful New Year.

## Amendment to M-81 to be Issued Next Week

The proposed amendment to the Container Conservation Order M-81, which removes all commodity and quota restrictions on the use of metal containers, was signed on Friday, December 20, and is expected to be issued on Tuesday, December 24. The Association, as it has in the past, will mail copies of the amended order to the industry as soon as they become available. (See story, *Canners Protest Issuance of Proposed M-81 Revision*, page 433.)

By removing all commodity restrictions on the use of metal containers, animal foods, shortening, coffee, beer, and many other commodities will be permitted an unlimited use of cans. The new order, however, retains can size limitations and plate specifications. These requirements, in the case of items that have been permitted the use of cans under the order, for the most part, are not changed. New requirements establishing can size limitations and plate specifications will be applied to cans for the additional commodities permitted under the amended order.

## Urge That Reservations for Gorrell Dinner Be Made at Once

The printed tickets for those who have sent in their reservations for the Gorrell Testimonial Dinner will be mailed shortly. In the meantime, requests for seats have been entered on the basis of "first-come-first-served," and are being handled accordingly.

A number of requests indicate a desire, however, for special seating arrangements, such as being placed with people from the same firm, same State, etc. Every effort is being made to comply with

these requests and to place everyone as agreeably as our acquaintance with our correspondents permits. This is being done without violating the "first-come-first-served" principle.

It will aid in the seating arrangement problem, however, if those who have not yet sent in their orders do so promptly. A supply of tickets are still available, and those who plan to attend the dinner are urged to make

their reservations at once. The reservations should be made by letter, accompanied by check at \$8.50 per ticket, made out to the Banquet Committee, N.C.A., and addressed to Miss Helen Tate, National Canners Association, 1739 H St., N. W., Washington 6, D. C. Seating arrangements are provided at tables that seat 10 persons each.

## Frozen Fruit and Vegetable Stocks Held in Cold Storage

Stocks of frozen fruits in cold storage on December 1, 1946, totaled 496,827,000 pounds as compared with 510,257,000 pounds on November 1, 1946, and 377,126,000 pounds on December 1, 1945, according to the U. S. Department of Agriculture.

Frozen vegetable stocks on December 1, 1946, amounted to 350,315,000 pounds as compared with 351,273,000 pounds on November 1, 1946, and 198,545,000 pounds on December 1, 1945.

The following table furnishes details by commodities:

	Dec. 1, 1945	Nov. 1, 1946	Dec. 1, 1946
FROZEN FRUITS	1,000 lbs.	1,000 lbs.	1,000 lbs.

## Freight Loadings Decrease

Loading of revenue freight for the week ended December 7, 1946, totaled 729,084 cars, the Association of American Railroads has announced.

## Stocks of Canned Peas

Civilian stocks of canned peas on December 1, 1946, totaled 11,256,000 cases, basis 24/2's according to the Association's Division of Statistics. This is slightly more than 2 1/4 million cases larger than December 1, 1945, stocks. Although shipments out of canners' hands during November were substantially smaller this year than last, shipments during the first six months of the 1946-47 marketing season totaled 29,700,000 cases compared with 27,046,000 cases during the corresponding months last season.

The following tables, which were compiled from reports of canners who packed 84 percent of the 1946 pack together with estimates for those not reporting, show the civilian supplies for the 1945-46 and 1946-47 marketing seasons and regional stocks on December 1, 1946 with comparisons:

### SUPPLY, STOCKS AND SHIPMENTS (BASIS 24/2'S)

## 1946 Dry Bean Production About Normal, USDA Report

The 1946 production of dry beans exceeded 15 1/2 million bags (uncleaned) according to the year-end crop report of the U. S. Department of Agriculture. This is 5 million bags less than the peak production in 1943, but is about the same as in years immediately preceding the war. Equivalent cleaned production in 1946 is estimated to be approximately 14 1/2 million bags, which is 2 1/2 million bags more than produced in 1945 when both the total crop and the percentage of clean beans were smaller.

The 1,698,000 acres of beans planted in the U. S. in 1946 was a little larger than the acreage planted in 1945, but the loss of planted acreage was less than half as much as a year ago, according to the crop report. Consequently, the 1,617,000 acres harvested in 1946 is nearly 9 percent larger than in 1945. The yield per harvested acre this year of 977 pounds is 96 pounds higher than last year. With a larger acreage harvested and higher yields per acre, production in 1946 is 15,797,000 bags of 100 pounds each, uncleaned, compared with only 13,083,000 bags harvested in 1945. The 10-year average uncleaned production, which includes four war years with large crops, is 16,408,000 bags. From 1930 to 1939, production of beans (uncleaned) ranged from 11 to 16 million bags.

The 1946 production of dry beans by States, compared with that for 1945, is shown in the following table:

State (Northeast)	Uncleaned 1945 Thousand bags <sup>1</sup>	Cleaned 1946 Thousand bags <sup>1</sup>	Cleaned 1945 Thousand bags <sup>1</sup>

## Canners Protest Issuance of Proposed M-81 Revision

A subcommittee of the Association's Planning Committee met with representatives of the Department of Agriculture and the Office of Temporary Controls on December 9 and discussed the possible effects of the proposed amendment to M-81, which would remove commodity and quota restrictions in the metal container order. Members of the subcommittee reported widespread industry concern over the supply of cans that would be available for this coming season's pack of perishables should the amendment be issued and requested that the order not be broadened at this time to permit the packing of non-food items. The subcommittee pointed out the present lack of inventory of cans and plans on the part of can manufacturers to allocate cans among all users upon issuance of the amendment.

The Department of Agriculture stated that it was aware of the situation and would be prepared to act should an emergency arise requiring the reissuance of commodity controls. The Department, however, stated it could not, on the basis of present conditions, oppose the amendment.

Without opposition from the Department, officials of the Office of Temporary Controls stated they would not withhold the order. In fact, that agency said it would be doubtful that they would change the proposed amendment even if Agriculture so requested.

Both of these agencies informed the subcommittee that the Administration's policy was to remove wartime controls as rapidly as possible and intimated that should the present restrictions of M-81 be continued, it was probable, under the Administration's program that the entire order would be revoked or otherwise terminated. The subcommittee was reminded that in any event M-81 ends with the termination of the Second War Powers Act on March 31.

The Association advised all State and regional canners associations of the plan to amend M-81 and requested that they express their views to the Secretary of Agriculture and to the Director of Priorities.

## In-Plant Chlorination Meeting

A meeting on in-plant chlorination was held in Chicago on December 16 and 17. The many aspects of this subject were discussed by a representative group of canners and others

having experience on in-plant chlorination in canning plants. Representatives of the Association's Washington and San Francisco Laboratories presented results of their studies. A report of the meeting will be given at the forthcoming National Canners Annual Convention in Atlantic City.

## Stokely Company Promotes Herbert F. Krimendahl

W. B. Stokely, Jr., president of Stokely-Van Camp, Inc., has announced the election of Herbert F. Krimendahl as executive vice president and a director of Stokely-Van Camp, Inc., to fill the vacancy caused by the recent death of John B. Stokely.

Mr. Krimendahl, who was president of the National Canners Association in 1940, has been associated with the Stokely-Van Camp, Inc., organization since the summer of 1944, when negotiations were completed for the acquisition of the business and assets of Crampton Canneries, Inc., of which company he had served as president since 1921. Mr. Krimendahl has been engaged in the canning business almost continuously since he left the Army at the close of World War I in 1919.

Mr. Krimendahl also served as chairman of the board of directors of The W. R. Roach Company until it was merged into Stokely-Van Camp, Inc., on April 30, 1946. From March, 1942, to August, 1942, Mr. Krimendahl served in Washington, D. C., with the War Production Board as Administrator of Tin Conservation Order M-81, and has been consultant to the Board since that time. He also serves as a consultant to the canned goods section of the Department of Agriculture.

Mr. Krimendahl will move his office from Celina, Ohio, to the head office of the company at Indianapolis, Indiana.

## INTERNATIONAL TRADE AGREEMENTS

(Concluded from page 431)

ment has supplied "last minute" information received from Europe. The new figures apply mostly to France. Those who need them for oral hearings which commence in Washington January 13 may obtain them by communicating with N.C.A.'s International Trade Service.

The Government has received a large number of complaints that the time limit for preparing and filing briefs has been too short to prepare the necessary data.

## Separate Broker's Directory

The National Food Brokers Association plans to issue a separate Directory for the week of January 12, listing those who will be in attendance at Atlantic City that week only. This will not supplant the regular overall Directory covering the canner's week. The broker's Directory will list members of NFBA, members of N.C.A. who have made advance registrations to be in Atlantic City during brokers week, and non-canner principals of NFBA.

## Report on 3-Year Canned Food Vitamin Study Ready

A report covering the three-year studies on retention of vitamins during canning, which were conducted by the Western Branch Laboratory as a part of the National Canners Association-Can Manufacturers Institute nutrition research program, has been prepared for use by technical representatives connected with the industry. This report includes a complete description of the work done up to July, 1946, and has been broken down into a summary section and separate sections for individual products.

Those interested only in a certain product or products may obtain a detailed description of the work done on that product or products without the necessity of obtaining the complete report, which contains over 200 type-written pages of methods, discussion and tabular data. There is only a very limited supply of the complete report still available and it is suggested, therefore, that those interested request only the section or sections covering products which they pack. The following is a list of the products studied and the sections corresponding thereto:

- A—General summary and methods of analysis
- B—Apricots
- C—Asparagus
- D—Beans, green
- E—Carrots
- F—Citrus juices (orange and grapefruit)
- G—Corn
- H—Peaches
- I—Pears
- J—Sardines
- K—Spinach
- L—Tomatoes, tomato juice, and tomato paste

Requests should specify the particular sections desired, and should be addressed to Dr. J. R. Esty, National Canners Association, 322 Battery Street, San Francisco 11, California.

### Forthcoming Meetings

- January 8-10, 1947—Northwest Cannery Association, Annual Convention, The Olympic Hotel, Seattle, Wash.
- January 9-10, 1947—Michigan State College, Cannery and Fieldmen's Conferences, East Lansing, Mich.
- January 12-18, 1947—National Food Brokers Association, 42nd Annual Convention, Atlantic City, N. J.
- January 17, 1947—National Pickle Packers Association, Annual Meeting, Palmer House, Chicago, Ill.
- January 19-24, 1947—National Cannery Association, 40th Annual Convention, Atlantic City, N. J.
- January 20-24, 1947—Canning Machinery & Supplies Association, Annual Exhibit and Meeting, Atlantic City, N. J.
- January 20-23, 1947—National American Wholesale Grocers Association, Annual Convention, Atlantic City, N. J.
- January 29-31, 1947—Purdue Agricultural Experiment Station, 21st Annual Indiana Cannery and Fieldmen's School, Lafayette, Ind.
- February 6-7, 1947—Ozark Cannery Association, 39th Annual Convention, Colonial Hotel, Springfield, Mo.
- February 7-8, 1947—National Pickle Packers Association, Annual Meeting, Bismarck Hotel, Chicago, Ill.
- February 10-11, 1947—Tennessee-Kentucky Cannery Association, Annual Meeting, Andrew Jackson Hotel, Nashville, Tenn.
- February 11-13, 1947—University of Maryland—Tri-State Pickle Association, Cannery and Fieldmen's School, College Park, Md.
- February 18-20, 1947—Michigan State College, Technical School for Pickle and Kraut Packers, East Lansing, Mich.
- March 7, 1947—Cannery League of California, Fairmont Hotel, San Francisco, Calif.
- March 19-21, 1947—National Association of Frozen Food Packers, Annual Convention, San Francisco, Calif.
- March 31-April 4, 1947—Frozen Food Institute, Inc., Sixth Annual Convention, Copley-Plaza Hotel, Boston, Mass.
- April 10-11, 1947—Tri-State Pickle Association, Spring Convention, Lord Baltimore Hotel, Baltimore, Md.

### Truck Crops Grown for Commercial Processing Reach All-time High During 1946, U. S. Department of Agriculture Reports

Production of truck crops for commercial processing reached an all-time high during 1946, the U. S. Department of Agriculture announced this week, in its annual report on acreage, production, and value of truck crops grown for commercial processing.

In 1946, USDA said, an aggregate production of 6,315,900 tons of 11 commercial processing crops was obtained for canning, freezing and other processing, exclusive of dehydration. This exceeds the previous record high 1942 production of 5,817,980 tons by about 8 percent, the 1945 production of 5,339,330 tons by 18 percent and the 1935-44 average production of 4,297,570 tons by 47 percent.

For 5 consecutive years, the acreage of truck crops for processing has remained at relatively high levels, with more than two million acres estimated as harvested this year. This is about 5 percent above the 1945 harvested acreage and 27 percent above the 10-year average.

Precipitation in most of the important areas of production during the 1945-46 winter months was heavy enough to build up a reserve supply of moisture in the soil. Growers generally made satisfactory progress in planting the various crops. The acreage planted to cucumbers for pickles, green peas, and lima beans for proc-

essing has never been exceeded. The yields for each of these crops were near average but with a record acreage harvested, the 1946 aggregate tonnage for these crops was the largest ever produced.

Despite severe losses of tomatoes from blight in many of the important eastern producing States, a record large crop is estimated for the United States in 1946. While the 1946 harvested acreage, totalling 579,590 acres, falls by about 4 percent of equalling the record 1942 harvested acreage, the yield per acre of 6.09 tons is one of the heaviest, equalling that of 1941. In California, harvests averaged more than 10 tons per acre. In Indiana, the yield was 6.4 tons per acre, or one-tenth of a ton more than the previous record yield of 1941, and more than one ton per acre above average.

This year's production of sweet corn for processing exceeds the 1945 production by about 8 percent but is nearly 6 percent less than the record high 1942 production. Snap bean production in 1946 is about 10 percent less than the 1945 production but 37 percent above average.

The following tables show the acreage, production, and season average grower prices per ton for the 11 principal truck crops grown for commercial processing by States and areas:

States	ASPARAGUS		Production		Season avge. grower price per ton

Frozen and Cured Fish Stocks  
in Cold Storage Are Reported

Holdings of frozen and cured fish in cold storage on December 1, 1946, were 188,486,000 pounds as compared with 177,120,000 pounds on November 1, 1946, and 169,359,000 pounds on December 1, 1945, according to the U. S. Department of Agriculture.

The following table lists, by varieties, the quantities of frozen and cured fish held in cold storage during the respective periods:

SPECIES	Dec. 1, 1945	Nov. 1, 1946	Dec. 1, 1946
	1,000 lbs.	1,000 lbs.	1,000 lbs.
<b>Salt-water fish:</b>			
Bait and animal food.....	1,826	1,835	1,784
Bluefish.....	148	183	177
Butterfish.....	528	545	665

Cured fish, total.....	21,073	27,571	28,431
Total, all fish.....	169,359	177,120	188,486

## Canned Fresh Lima Bean Pack

The total pack of canned fresh lima beans for 1946 amounted to 1,717,887 actual cases of all sizes as compared with 1,551,245 cases for 1945, according to the Association's Division of Statistics. On the basis of cases of 24/2's the 1946 pack totaled 1,747,000 cases compared with 1,581,000 cases in 1945.

The 1946 pack by can size and area is shown below:

## OPA Consumer Unit Quits

The Consumer Advisory Committee to the office of Price Administration, a 27-woman group which has functioned for three years, resigned this week.

Before quitting, the group made a strong recommendation to the President for the maintenance of a national consumer committee advisory to him; also that consumer interests be

represented in such agencies as USDA, Commerce, and the National Housing Agency.

The group further urged that consumer interest be represented in the Economic and Social Council of the United Nations, Food and Agricultural Organization, International Trade Organization, and the World Health Organization.

## USDA Meat Production Report

Meat production under Federal inspection for the week ended December 14 totaled 363 million pounds, according to the U. S. Department of Agriculture. This production was 5 percent below the 383 million pounds produced in the preceding week and 4 percent below last year.

(Tables on processing crops continued from page 435)

### Estimated Fruit Production Continues to Show Increase

The following statistics on fruits are taken from the U. S. Department of Agriculture's 1946 Annual Summary of Crop Production, and in most cases show the total production of fruits for all purposes. Reports on the utilization of the crops between fresh and processing channels will be issued later. Citrus production was unchanged from the report shown in last week's INFORMATION LETTER and is not included in the following table. The 1946 production, compared with that for 1945, is shown below:

Commodity	Production	
	1945	1946
1,000 bushels		
Apples (commercial)		
Eastern States.....	14,407	54,287

### Stocks of Canned Corn

Civilian stocks of canned corn on December 1, 1946, totaled 10,940,000 cases basis 24/2's, according to the Association's Division of Statistics. This compares with December 1, 1945, stocks of 12,327,000 cases. Shipments out of canners' hands from August 1 to December 1 this year totaled 18,841,000 cases compared with 15,260,000 cases during the same months last year. Shipments during November 1946 totaled 5,337,000 cases or slightly smaller than November shipments in 1945.

The following tables, which were compiled from reports of canners who packed about 81 percent of the 1946 pack together with estimates for those not reporting, show the civilian supplies for the 1945-46 and 1946-47 marketing seasons and regional stocks on December 1, 1946, with comparisons:

## American Exporters, Traders Not to Limit Tariff Requests

American exporters and manufacturers who wish the Government to seek benefits for them in the trade agreement negotiations next spring need not limit their requests to tariff reductions abroad, the Office of International Trade, Department of Commerce, reported December 17. In an announcement to the trade, OIT pointed out that briefs may refer also to other barriers to sales abroad, including quotas, allotment of exchange, or discriminatory treatment by State monopolies.

Anyone wishing to appear at the forthcoming hearings of the Committee for Reciprocity Information must submit briefs by December 21, OIT said. The briefs may be supplemented by verbal testimony at the hearings, which begin January 13, 1947, in the Commerce Building auditorium, Washington, D. C.

Clarification was necessary, it was said, because inquiries had revealed misunderstanding in some trade circles as to the scope of the proposed negotiations and the requirements for those wishing to testify at the hearings. Briefs and testimony covering concessions to be sought from foreign countries may refer to any commodity which a firm desires to export to any of the eighteen countries included in the negotiations next April.

The State Department has already announced its intention to negotiate reciprocal trade agreements in the spring with the following countries: Australia, Belgium, Brazil, Canada, Chile, China, Cuba, Czechoslovakia, France, India, Lebanon (Syro-Lebanese Customs Union), Luxembourg, Netherlands, New Zealand, Norway, Union of South Africa, Union of Soviet Socialist Republics, United Kingdom, and the colonies of these nations. OIT called attention to the fact that requests by American business men may include commodities they wish to export to the British, French, Netherlands, and Belgian Colonies, as well as to the respective mother countries.

The National Cannery Association, as well as other trade associations, has obtained from the Department of Commerce statistics and information about trade barriers in foreign countries for inclusion in briefs. The Department suggested that interested parties who may be unable to prepare complete information before the December 21 deadline, submit briefs making their general interest known, including such information as they

may have available, and supplement that information in verbal testimony before the Committee for Reciprocity Information in January.

Certain rules regarding submission of briefs have been published by the Committee for Reciprocity Information, Tariff Commission Building, Washington 25, D. C. (See article on this page.) They include the requirement that ten copies of each brief be submitted; one of these must be sworn to. A pamphlet containing these rules, as well as one containing suggestions for use in preparation of briefs, may be obtained from the Committee. It was pointed out that all requests for appearances before the Committee must be accompanied by briefs.

## Trade Talks with Russia

The Russian Ministry of Foreign Trade has accepted United States proposals for a series of trade conferences. These meetings will take place during the next few months, while appropriate government departments are preparing basic data for projected trade agreements. The first conference will be held in Washington to be followed by others in Moscow.

E. C. Ropes, head of the Russian section in the Office of International Trade, estimates Russia's immediate needs for American products at a dollar volume of about \$200,000,000. The Amtorg Trading Mission, long established in New York as the Russian official buying agency, will be expanded with personnel from the Washington Purchasing Commission

which purchased war goods for Russia in this country and the head of this agency will head Amtorg, it is stated.

American business houses will be enabled to sell to the Russian Government from their own branch offices in Russia, Mr. Ropes says, as well as through the New York agency.

## Data on Canned Food Duties

The U. S. Tariff Commission is making available to interested parties digests of statistical, technical and trade information with respect to each of the dutiable canned fruits, vegetables and fishery items which have been listed for consideration of possible concessions by the United States in the pending trade agreement negotiations.

Requests for this information should be addressed to the Secretary, United States Tariff Commission, Washington 25, D. C. Those requesting the data should indicate specifically the particular products in which they are interested.

## Conway to Direct Exports

Captain Granville Conway, former head of War Shipping Administration, has been appointed by the President to undertake the job of coordinating emergency export programs. He will direct the work of all government agencies concerned with the export of grains, coal and other products for which there is urgent need overseas.
